Monetary Systems.

Individuals the world over have always discussed money. They have always been interested in money. But the vast majority of people in years gone by never bothered their heads very much about monetary systems, and how they worked. They knew that their country was on "a gold standard," but they did not trouble to find out and understand just what that meant. They knew that Governments and banks issued paper bills and that these bills were money. But the main thing one and all were concerned about was how many of these bills they could get in return for the products or the services they had to sell, and how far those same bills would go in buying the goods or services they found it necessary to buy. Of the system behind the issue of these paper bills the average person knew little and cared less.

Today this indifference has disappeared like so many other things in this rapidly changing world. People are still interested in money, how to get it, how to spend it, and what it will purchase for them. But they also want to know all about the system back of the issue, circulation, and exchange of money. The people of the world have been awakened with a jolt to a realization that the monetary system is not working as it should work in the interest and welfare of mankind, and we hear the opinion expressed on every hand that money has become the master and not the servant of mankind; that instead of remaining a mere convenience in order to expedite the exchange of the world's commodities and services, it has itself become a commodity; and, that being the case, the people want to know who controls the production of that commodity—money.

As a result of this aroused interest, everybody is talking about monetary systems. People are debating the subject whether they understand it or not. The number of theories, opinions, suggestions advanced are legion; they far outnumber all the monetary and banking systems of the world. Much of what is said, and is even being actively advanced as a panacea for the world's ills, is based in the most profound ignorance. The "cures" being offered would prove far worse than the disease they would seek to overcome.

Out of the confusion of ideas and suggestions and so-called solutions, one thing emerges. It is this: That no one nation can of itself remove the cause of its financial embarrassment and cure the malady from which it is suffering. There may be persons who honestly think that their pet theory will work where all others have failed; that a nation can, of itself, remedy its own ills, and that even a subordinate state or province within a nation can do so, but all history proves the fallacy of any such notion.

In our discussion, the one thing to do is to take a middle course,—not to take the dictum of the banker on the one hand, nor the theories of the radical on the other hand, but rather to weigh well the opinions and advice of impartial students of world economics, men trained and having experience in the weighing of causes and effects, men who have no axe to grind, but who desire that solutions be reached based on solid facts and economic truth.

There are such men in most countries, and outstanding in this group in the world today is Professor Gustav Cassel, of Sweden. He is an originator, not merely an exponent of a great deal of modern economic thought. His name has been sought by central banks in many countries, by governments and by the League of Nations. His opinions cannot be lightly dismissed. He was invited to deliver the Rhodes Memorial Lecture this year at Oxford. There were three lectures dealing with the gold standard and the break-down of the world's monetary system. These lectures have now been published in book form.

One Canadian reviewer of this book says that Professor Cassel mixes as words in these lectures. There are none of the cautious phrases and complicated qualifications to which one is accustomed in the writings of economists. He speaks as one having authority and evidently considers that his subject has been carried beyond the bounds of controversy. Professor Cassel first shows that gold has ceased to impart value to money and that its automatic regulation of the value of money has given place to bank policy as a means of regulation. "For a true understanding of the monetary system," says Professor Cassel, "it is of fundamental importance that we should make ourselves familiar with the fact that a national currency never is anything else than a paper currency and that the maintenance of a gold standard only means that this currency, by a deliberate monetary policy, is kept in a certain parity with gold." He goes on to show that the value of gold itself is then determined by the monetary policy of the leading gold country, and he lays the blame for the great fall in world prices upon the monetary restriction policies of France and the United States.

Professor Cassel points out the apologetic old gentlemen who will not entertain the notion of a "managed money" and talk largely about "sound money," by making it absolutely clear that we already have a managed money. In fact he attributes a great deal of our grief to the fact that not only is our money managed, but that it has been very badly managed. After pointing out the amount of intelligent co-operation that is needed to make even a reformed gold standard work, he concludes that gold itself, in the circumstances, is regarded as completely unsuitable for use as a standard of value.

Professor Cassel complains of the loose and unintelligent use of the word inflation, which does not mean what the press think it means. An expansion of the legal basis for money does not necessarily involve inflation. Anyhow, he thinks that some inflation would be a good thing. "The best thing that the gold standard countries could do," he says, "would be immediately to start an inflation of their currencies." Remember, it is no crack who pronounces this, but one of the world's leading authorities, a mature man, and one whose influence has been established and proven.

Palpitation of the Heart Nerve Bad - Could Not Sleep

Mrs. Fred Simpson, 3111 Street, Saskatoon, writes: "I was bothered with palpitation of the heart, and my nerves were so bad I could not sleep."

I was getting desperate and consulted my family doctor who recommended me to use Milburn's Heart and Nerve Pills. I purchased a box and got such relief I would gladly recommend them to all who are troubled as I was."

The sale of all drugs and general stores; get up only by the T. Milburn Co., Ltd., Montreal, Que.

U.S. Bank Follows

Chart All Its Shores On Southern Hemisphere Says Investigator

All American bank failures cannot be blamed on the business depression, Dr. Charles O. Hardy, of the Brookings Institute, reported after an intensive survey.

He estimated that in the decade 1921-1931 there were 4,784 bank insolvencies in the United States, or 20 per cent. of the number of banks in operation at the beginning of the period.

Hardy blamed "the inherent banking instability" on:

"The whole system of pyramiding a vast array of obligations which technically or practically, are payable on demand on a slender basis of cash and an even slenderer basis in the form of stockholders' equity. This dependence for solvency is placed on assets which can only be liquidated by transfer or by wholesale destruction of monetary value."

He concluded his survey with the assertion that "while the United States is not the only important country in which banks become insolvent, it is the only one in which they are allowed to fail."

HAD RHEUMATISM FOR 20 YEARS

But None Since 1930

This man must have something like a record for suffering. He says: "Since 1910 up to 1930—that is 20 years—I have been a great sufferer with rheumatism. I am pleased to say that since 1930 up to date, I have been free from that dreadful pain, simply by taking Kruschen Salts—and nothing else. I must say that 20 years is a long time to have that awful rheumatic pain about one."—W. P.

Your rheumatism is just like his and everyone else's. It is caused by sharp-edged uric acid crystals getting into your joints. Kruschen will dissolve these crystals away. Furthermore—if you keep up the "little daily dose" ever afterwards, it will never be possible for them to form again. Rheumatism will be gone for good.

Simply Needed

It is to be hoped that higher education is not going to result in a generation or two of individuals who prefer to say: "I proceeded to my residence and pursued a volume," when they might just as well admit: "I went home and read a book."

for NEURITIS

One thing this helps to do is to get rid of the pain. Then all the business party is.

MINARD'S

"KING OF PAIN"

LINIMENT

A Real Breakthrough

Portland, Ind., cracks a stone shaft memorial to Elwood Haynes as inventor of the modern automobile. But what a row of shafts a grateful public would be willing to erect to anybody who invented an automobile that would stay modern for more than one season!

Persian Balm invigorates every woman with subtle charm. Delicately fragrant. Cooling and healing. Disperses all roughness or chafing. Makes skin delightfully soft-textured. Every woman should use this priceless toilet requisite. Daintiness—beauty—refinement—Persian Balm achieves these in every instance. Softens and whitens the hands. Promotes clear and youthful loveliness. All women who care for additional charm unhesitatingly choose Persian Balm.

The Bright Side

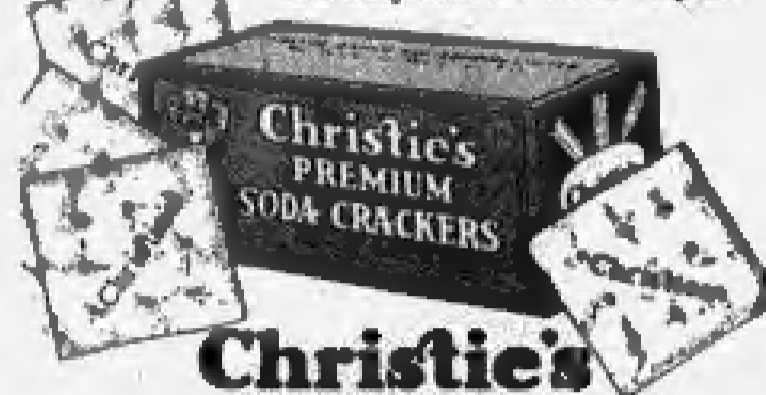

You can always find some reason for looking on the bright side of things. For instance, we are so glad to find out that we are not the official office boy who had to announce that Premier Cheng Hsiang-ling of Manchukuo was in conference with Foreign Minister Hsiao Chieh-Yeh.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mithra or Gravel Worm Eliminator.

Pays Fine Tribute

French Premier Pays Homage To German War Dead

Premier Edouard Herriot, of France, paid tribute to the German war dead in an address dedicating a new municipal hospital.

"Now in Lim," Herriot said, "sleep 75,000 German war dead who were undoubtedly men seeking only to live in tranquility. Let us confer on them the homage that we have conferred on our own dead. France has not hatred for her former enemies. What our country wants is a plan for pacific organization which will obtain from everyone, a reconciliation of arms."

An Oil That Is Found Everywhere.—Dr. Thomas' Electric Oil was put upon the market without any flourish over fifty years ago. It was put up to meet the wants of a small nation, but so soon as its merits became known it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

War Debt Cancellation

United States Would Profit If They Would Agree To It

Senator Borah estimates that the economic depression has cost the United States \$100,000,000,000 (about \$100,000,000,000). Such calculations are necessarily conjectured, but the loss has certainly been fabulous, and must continue so long as the world's financial machinery is thrown hopelessly out of gear by the attempt to transfer huge payments of war debts. That is at bottom the justification of the seeming paradox that it will handsomely pay the United States to cancel her war debts.—London Daily Telegraph.

Canadian Theatres Safe

Have Highest Rating in Respect To Fire Risk

Reports from Ottawa show that the theatres in Canada now have the highest rating in respect to fire risk of any property. This fact was brought out in the report just issued by J. Grove Smith, Dominion Fire Commissioner.

The report further shows that there were only 10 fires in theatres in the last year and not one of them of a serious nature. The total loss was only \$4,200.

The report gives high credit to the type of men engaged in the business of managing theatres in the Dominion. Mr. Smith stated that nowhere in the world did the managers take the precautions to safeguard their patrons as in Canada, and particularly in Ontario. When one stops to think that over 3,000,000,000 feet of film was shown in the theatres in a season and that in Canada last year this small fire loss is remarkable.—St. Thomas Times-Journal.

Easy Teething

"Baby cut all his teeth with no trouble, thanks to BABY'S OWN TABLETS," writes Mrs. Thomas Shaw, Hamilton, Ont. Scores of other mothers have written in similar vein. Give YOUR child BABY'S OWN TABLETS for teething troubles, upset stomach, sleep fever, colic, colds, constipation, diarrhoea, or whenever he is cross, restless and fretful. Easy to take so candy, and absolutely SAFE—see analyst's certificate in each 25-cent package. Show 1,250,000 packages sold in 1931.

CUNARD ANCHOR-DONALDSON

Inter-Provincial Ploughing Match Held At Ottawa Was Attended By Thousands Of Spectators

It would seem that the present generation have by no means lost veneration for the cult of the soil—and a demonstration of how this ancient industry should be done is this day and generation can attract crowds as large as attend big league baseball or football games. An inter-provincial ploughing match was held recently at the Canadian Government Central Experimental Farm, on the outskirts of Ottawa, and many thousands attended to watch the competition which during the four days the match was held. On the last day more than 20,000 persons were present to see the finish of the first contest, when farmers were ploughed from one end to the other of the large field, as straight as a gun barrel. This ploughing match, which was open to horse and tractor ploughs, demonstrated that the horse plough is by no means on the way to join the Duro or the Great Auk, indeed, the consensus among farmers felt is that the horse plough is steadily plucking its way back towards the place of its former popularity.

The Inter-Provincial Ploughing match was formally opened by Mr. Macmillan, the Earl of Strathmore, Governor-General of Canada, who tried his hand at ploughing a long, close, straight furrow and made a good showing for an amateur. The ploughs used in the contest were actually a substantial improvement on the first that iron plough made in Canada more than 100 years ago. This distinction of making that implement belongs to Strathmore Park, a native of Lisle, Renfrew County, New York. In 1804 he moved to Chippewa, Ontario, near Niagara Falls. He was poor, but had an idea that cast-iron ploughs would be more serviceable than those of wood and wrought iron, which were then in general use. He gathered together scrap iron, constructed a rude form and cast three ploughs, which proved to be made of lightness and durability. The demand for his ploughs soon became great. In 1807 he died at the age of 28 years. His business was carried on by a Mr. Macdonald. In three years Macdonald made a net profit on the sale of his ploughs of \$5,000.

Birds From Masses To Sheep

Supplies feeding young lambs in British Columbia

Several methods employed by magpies to secure food among the large flocks of sheep and lambs during spring are described by A. Bryon Williams, British Columbia game commissioner, in his latest report.

When the birds are only a few hours old the voracious magpies pick out their eyes, leaving them blind and helpless to die in agony. Then the birds feast on their young, tender lamb.

Recently, magpies were paid on 3,000 sheep and were estimated as additional 1,200, a total of 4,200 last year, but the birds do not appear to be greatly diminished in number.

The commissioner commends the total extinction of magpies and crows, the latter being almost as bad as magpies. Whereas about 3,500 crows last year, now 11 crows, 100 hawks, and 150 owls.

Mr. Williams describes with dramatic color as a real monster. Mountain cats are common in the wild and quickly learn how to stalk on wild life. Young game birds and chickens fall easy prey to the cats.

Read To Longer Life

Scientist Claims Way To Better Health Depends On Food Values

The secret road to longer life and better health for men leads through the stomach. Latest scientific study of nourishment value of foods show it is possible to extend the average length of life and better health of the human race by improving diet. Dr. H. C. Sherman of Columbia University told the American Public Health Association.

Canada's Flour Exports

Estimated Exports In September To United Kingdom Is Reported

In 1901 Canada sent 2,500,000 barrels of flour to Great Britain out of a total importation by the British of 4,141,180 barrels. The United States sent 1,397,160 barrels. It is reported that Canada will increase substantially her exports of flour to the United Kingdom.

In 1901 Great Britain imported to the equivalent of 280,000,000 bushels of wheat. With the flour and wheat preference granted through the agreement, the wheat exports from Canada to the United Kingdom are anticipated to increase by many millions of bushels.

And as the wheat industry is one of the chief businesses of Canadian property, the advantages granted wheat and flour are hoped to prove important factors in the national recovery.

Fashion Magazine
The latest in fashion
Illustrated with every
fashionable dress

Here's a charming day dress following the latest line made in favour.

The simple design with charming "V" neckline has a becoming tie-like trim.

Front opening decoration the hips. The lower skirt is pleated, giving decided height to the figure.

Materials such as rough crepe silk, crepe satin and silk tulle are used and suitable to fashion it.

Style No. 2023 is designed for sizes 32, 34, 36, 38, 40, 42 and 44 inches bust.

Size 36 requires 3 1/2 yards of 36-inch material with 1/2 yard of 24-inch contrasting.

Price of pattern 25 cents in change or cash (cash is preferred). Wrap only carefully.

New Style & Lip

New Style Shells and Pale Yellow Yolk New Harvest

When we speak of good taste in eggs we usually mean pasteurized, or at least, sterilized taste. But better and egg taste declares the recent taste in the eating world is eggs, new-told eggs, fresh eggs—or eggs. Eggs are, perhaps, more abundant than in the public in the international that correct style is eggs from the poultry yard. L. B. Williams, president of the United States Egg Men's Association, is quoted as authority for that device, which makes it evident that artistic considerations enter into the marketing of eggs. Of course, we Canadians have as many protective laws and inspectors always working that our eggs must be always in good taste for breakfast table manners. At least, legally, no unwashed egg can enter a home unless duly branded according to class.

Still, we don't know where that Chicago expert gets his fashions for taste and their eggs. The egg public is not likely to accept the taste of the package. The average egg appears doesn't go by shells, beige tint, sun tan, or what not. A pale yellow is not so worthless as long as the period between the hen and the cup is moderately brief. However, the golden yellow of an egg is rather appetizing to eat the less distinctive, though a more egg-color might not please the more pastel shades of the yolk, as it were. Then there is a considerable section of the egg's public with a strong leaning to the belief that stronger coloration of their yolks is richer and more nutritious content. The chemistry people deny that fancy. At the same time, however, house keepers who have facilities and facilities to satisfy both their white eggs in coffee and produce the beautiful rich warm tone natural to hen fruit of good taste. Moreover, the average egg consumer will never believe Chicago designers can create a fashion in eggs—except in the depression.—Brandon Box.

Italian Sailor Was Drown

Found Submarine Over With Great Danger To Himself

Sailor Giuseppe Valentini got a diver's medal because he thought of others and forgot himself. The submarine N-4, the second launched,

started to go down with the evening lower open off Target. Valentini, in the tower at the base, leaped to the deck and closed the hatch, from the outside. He was left behind in the ocean and was nearly dead when picked up. The submarine later returned safely to the surface.

New Process Being Perfected For Producing Synthetic Lumber Stronger Than Natural Product

Alkali Makes Good Pasture

Has Economy For Farmer To Harvest Second Crop

"We have heard a new way that he did not grow alfalfa, because 'it makes too much hay.' That's because we think he was right. Ordinarily it is a new thing to get a second and a third cut of alfalfa, but the best hay-making season is over when they have had cutting to often a problem. This year, after having 100 tons of hay, we have not at all anticipated about a second cut. We had four fields that would have yielded another crop, but only two of them were harvested—the two smallest—and we made ourselves think that the other two were needed for pasture, as indeed they were for the pasture season was only half over at the time. Farmers rarely have too much pasture, and the live stock will usually take care of any second or third cutting that a weary farmer does not care to harvest. Where alfalfa will grow there is no second argument against it.—Farmer's Advocate.

The Field Of London

Life Guards Have Time To Kill To Kill

The Life Guards are once again back at their old barracks quarters in Knightsbridge. They have been stationed there for about 200 years. Tradition was broken the other day when for regular military reasons, the Knightsbridge barracks, the oldest in the country, were vacated by the mounted shock troops and taken over by a battalion of Foot Guards. Strangely enough, it has been London's modern traffic conditions that have restored the Life Guards to their old home. They are much closer to Whitehall at Knightsbridge, and their daily progress to and from mounting guard at the old Whitehall 50-yard office has obliterated in the morning motor traffic. It is said the motor posted up inside the Whitehall battery-batteries where the Life Guards mount guard are identically the same as they were more than three centuries ago.

A photograph taken at a recent social gathering in Knightsbridge revealed that only one man was wearing a hat, and he was an Englishman on his first visit to Knightsbridge.

The steel industry has developed 1,000 kinds of alloy steel.

Do You Know?

—Chicago Leader National Edition

That the remotest form of the Baiting River in northern British Columbia has a channel through a wall of solid rock 100 feet high and 2 feet thick? The Baiting River as it is called is seen in the photograph showing the extraordinary narrowness of man.

Working 20 years or more for agricultural better to grow on the slope is no longer necessary, a report by a professor in Iowa State College to the American Chemical Society says. Any food that can grow in the forest can be duplicated out of the refuse from American farm crops—corn, alfalfa and other crops and byproducts. The heartiest of this synthetic food, according to the report, closely resembles that in appearance, as well as in durability, density and strength, while its over-breaking coefficient is nearly double that of both and almost equal to that of common steel. Variations of the present of manufacture produce "wood" as light and flexible as cork.

One advantage of this synthetic product is that it takes less water to produce than it takes years for trees to reach commercial size. Another is that it can be made out of the refuse from feed crops. With another advantage is that laminated synthetic lumber can be molded into various dimensions, which serve later uses. A house can be built out of this material, says the Iowa professor, at about the cost of one built out of natural lumber and will be stronger and less expensive to heat, a result of its better insulation. The cost of producing the heartiest of this synthetic building material however is approximately \$250 a ton, which means for the time being to place it out of competition with natural products. As timber becomes scarcer and consequently more costly, and the methods of manufacturing synthetic wood are improved and thereby cheapened, this discrepancy in cost may be expected to diminish and ultimately to disappear.

Again chemistry has come to the aid of nature and man. When the first atom bomb into the primordial dust of America, a replacement could travel from the Atlantic to the Mississippi without ever seeing the sunlight. Waste is clearing off the forests—some of it, however, from the progress of agriculture, some of it unproductively cheap and unnecessary—threatened to leave the United States with an inadequate timber supply. The slow process of reforestation was started in order to forestall that calamity. The raising of lumber on Western mountains and Southern coastlands leads reforestation all the way.—Detroit Free Press.

An Antidote To Mass

Velvet At A Thousand Dollars Is One Of Costliest In World

One of the most beautiful, clearest and costliest fabrics in the world is to be seen in Spide Park's Velvet Room, which openings just now.

This house belongs to Wilson Cross, chairman of the American Club in London, and president of an oil company. It is a full-sized, full-fledged bright chamber, 60 years old, and valued at a thousand pounds, and Mr. Cross has just brought it from the United States, where it has been wearing his price in a special shop unknown to our house above.

It belongs to the type that Americans call a "two-good house," which means that in addition to the walls, roof and plaster or gipsy, it has been treated to two special interventions: paper—a wall and a roof in which the legs move all four in response instead of as two pairs.

The special gift is bought by Americans overseas to their parents because for long-distance riding it is so easy to get on and off, the rider being able to sit still in his saddle instead of riding in the motion of the horse.—London Sunday Pictorial.

Something To Know

The present glass liquid from smoking which has entered or entered fruit is poured into it, being out a large funnel in warm water, held in one hand and the bowl in the other pouring the hot liquid. Once you may be disappointed when but just as preserve is poured into them by the same method. When a bottle of 200 lbs. is to be filled a glass out from a warm blanket is convenient, as it is thick and does not require setting.

FARMERS ASK FOR LIMIT ON OTTAWA PACT

Douglas, Man.—Limiting of the imperial conference agreement to the "life of the present parliament" unless a mandate is obtained from the people confirming the five-year term they now contain, is demanded by the United Farmers of Manitoba in a resolution unanimously adopted at the annual convention today. The resolution declares the present policies, "so relevant to agriculture, be discontinued."

Another resolution bearing on international problems was adopted when, after lengthy debate on currency, a motion was adopted urging the dominion government to stabilize the rate of exchange on the pound sterling at a parity of \$4.86 2/3.

Demand for a further reduction in lake freight rates, and the encouragement of shipments via the Hudson Bay route, the dominion government to handle the traffic if necessary during the initial development, also received the support of the convention.

Wheat Surplus Increasing

Rome, Italy.—Exportable supplies of world wheat are inferior to 1931 by 80,000,000 bushels, the International Institute of Agriculture reports.

This drop is offset by a fall in the probable requirements of importing countries of 170,000,000 bushels. This situation has been caused by poor crops in the exporting countries and good crops in the importing countries, coupled with an abundance of rye, corn and potatoes, the institute report says. Stricter regulations of international wheat trade have also played a part.

The total available for export is fixed at 1,300,000,000 bushels. Of this amount 570,000,000 bushels are old stocks, and 730,000,000 bushels represent the new crop surplus.

Since the old exportable stocks are adequate to meet almost a tripling of the needs of importers, practically the entire surplus of the 1932 crop will be carried over for consumption in 1933 and 1934.

It is estimated the existing stocks have increased by 110,000,000 bushels.

Jobless In Toronto

Mayor Aikin, Premier Bennett To Care For Unemployed

Toronto, Ont.—It is the duty of the Dominion Government to care for jobless men who arrived by train from Winnipeg, Mayor W. J. Stewart declared, and wired Premier R. B. Bennett that the government should provide for transportation of the men to their homes.

The number of arrivals was variously estimated as high as 300. Mayor Stewart, in his telegram, reported arrival of 89 on one train and said he was advised another train had arrived with a larger quota. He claimed the homes of some are in the west.

The jobless are said to have come from different parts of western Canada, many of them from the harvest fields in the prairie sections.

Heavy Wheat Reports

Vancouver, B.C.—Vancouver is not waiting for the effect of British preference to send its wheat export totals to new high marks. During the past seven days, the weekly report of the Vancouver Merchants' Exchange reveals, a total of 2,777,422 bushels was exported. This brings the season's total to 30,891,546 bushels as compared with 10,158,282 bushels at the corresponding date last year.

Wheat Loans Preferred

London, Eng.—Government official confirmed in the Canadian Press that Canadian wheat shipped in bond to the United States, pending sale and shipment to the United Kingdom, will not be entitled to the six-and-a-half-cent imperial preference immediately at the imperial conference.

W. N. U. 100P

Has Little Information

Nothing Useful To Shed Much Light On Shavings Of College Funds

Stony Mountain Penitentiary, Stony Mountain, Man.—Chattered about an impromptu visit to a little room in the administration building of the prison, a board of inquiry and staff learned from John A. Mackay that he knew little of the financial collapse that sent him to penitentiary for seven years.

Obviously suffering severely, the former lawyer, university lecturer, churchman and financier lay propped by pillows on a couch and emphatically declared he saw anyone else to his knowledge, ever profited from the financial debacle that wiped out endowment funds of the University of Manitoba and the Church of England, and swept his own investment firm into bankruptcy.

At times writhing in pain and bearing his head with half closed eyes, Mackay lifted a shaking white hand to emphasize his declaration. He had no memory of any happenings in his office, he said, and asked the commission, investigating \$1,000,000 default in college funds, to allow him to continue his plans for providing information.

May Have Planned Robbery

Youth Arrested in Shadow Of Missing MacDonald

London, Eng.—What was believed to be an attempt to rob Prime Minister Ramsay MacDonald or his house was revealed in a case in Birmingham police court.

Ivan Serova, described as a British subject, was arraigned on a charge of loitering at the Prime Minister's home. He was arrested, police said, in the garden of Mr. MacDonald's home at 5 a.m.

Mr. MacDonald rarely saw his lodge at Pengeur, near Hampton, while parliament is in session, preferring to remain in his official residence at No. 10 Downing Street.

The head of the National cabinet was believed to have been at Pengeur Tuesday night, November 1, however, during the disturbance in Whitehall.

Serova is a well-dressed, thick-set youth, who speaks English with a foreign accent. He was carrying bricks under his arms when the police found him.

The prisoner said he had just entered the garden for a look around. He did not point a sword.

New Air Regulations

Operating Them Over Canadian Penitentiaries Is Forbidden

Toronto, Ont.—The Mail and Empire in a despatch from its Ottawa correspondent, quoted J. A. Wilson, controller of civil aviation, as issuing an order forbidding operation of aircraft over Canadian penitentiaries.

The text of the order as carried by the newspaper is:

"Pilot and operators of aircraft are hereby warned to avoid flying over or near any penitentiary or like institution. In future any aircraft observed intentionally flying over such institutions for any purpose whatever will be considered to have committed an infringement of the air regulations concerning prohibited areas."

Banger Marches On Home

London, Eng.—Banned in their third attempt to enforce their demands, the unemployed "banger marchers," who straggled into London, turned homeward. Thirty men climbed aboard a charabanc and started back for Brighton, whence they came. Other contingents also prepared to go home.

Seize Motor Ship

Woods Hole, Mass.—The motorship "Anacosta" of Halifax, with a crew of 11, was captured by U.S. coast guardsmen in New Bedford harbor, one mile from its destination.

In Charge Of Indian Affairs Ottawa, Ont.—Dr. H. W. McGill of Calgary has taken over his duties here as deputy assistant Indian Affairs.

Turkey has materially reduced its consumption tax on gasoline.

Japan plans to spend nearly \$20,000,000 on public works this year.

IMAGES PENITENTIARY

W. R. MacLoughlin, M.C. of Ottawa, who has been appointed temporarily warden of Kingston Penitentiary, scene of the recent serious riots. Col. MacLoughlin served overseas with the 26th Battalion and until he resigned was Commander of the 26th Ottawa Battalion of the militia. He is forty years of age.

Britain Lifts Embargo On Canadian Livestock

We Need To Revivify Cattle For Food Of Britain

London, Eng.—The House of Commons moved without division to remove the existing embargo against importation of Canadian cattle to the United Kingdom.

The House decided to lift the embargo after passing the most explicit clause of the Ottawa agreement, bill, 268 to 85.

Malcolm MacDonald, son of the Prime Minister and under secretary for the Dominion, explained there was no further need to exclude Canadian cattle from the country on the ground it might be diseased.

He said also the period of detention of cattle at the Canadian port of shipment would be one day instead of the customary three days on the length of the voyage was sufficient to allow time for development of disease should it occur.

Lifting of the embargo will go into effect when the Ottawa agreement bill becomes law. The bill is expected to encounter little opposition in the House of Lords.

New Amendment

Ottawa, Ont.—A new amendment to the motion for ratification of the Canada-United Kingdom trade treaty was moved by Dr. Thomas Donnelly (Lib., Willow Beach), in the House of Commons. It declares that no approval by the Canadian parliament be held to preclude the entering of this country into any arrangement which may be proposed at the coming world economic conference.

Want Railway To Keep Agreement

Montreal, Que.—The city of Montreal intends to keep the Canadian Pacific Railway to its contract to keep 2,000 men employed at its Angus shops here. What amounted to an ultimatum to the railway was issued by the city following a conference.

Against Public Ownership

C.N.R. Vice-President Warns Not Before In Government Ownership Of Railways

Montreal, Que.—The first point the following dispatch from the Ottawa correspondent:

"Plans put forward by E. W. Beatty, K.C., president of the Canadian Pacific Railway, and Gerard Reed, K.C., former legal vice-president of the Canadian National Railway, for the abolition of Canada's worst railway situation were rejected by the recent royal commission on transportation in order that the scheme suggested by Mr. Beatty Thomson, former C.N.R. president, might be adopted in its substituted outline.

"Perhaps an emotional appeal to R. as in the statement of Mr. Reed, after his years of association with the Canadian National system, that he does not believe in public ownership.

"My experience of public ownership of railways has been that it means government ownership," he told the commissioners.

"You mean political ownership?" Mr. Joseph Flavelle asked him.

"Yes," Mr. Reed returned.

"The plan of President Beatty of the C.P.R. for the solution of the country's transportation difficulties, as revealed by the evidence, was for the government to lease the C.N.R. to the C.P.R. for a long term, or else in perpetuity. Mr. Beatty estimated that the C.P.R. management of the two systems would result in economies totaling \$80,000,000 annually.

"In commenting upon this scheme, C.N.R. witnesses stated the savings would not amount, in their opinion, to more than \$20,000,000 annually.

"Mr. Reed's proposal was virtually a temporary amalgamation.

Interested In Grain Show

Shaw's, Previous Proposals To Complete In All Cases

Regina, Sask.—John A. Shaw, managing director of the World's Grain Exhibition and Conference, has returned to the city after an extended visit to western Canada in the interests of next year's world-wide cereal exhibition.

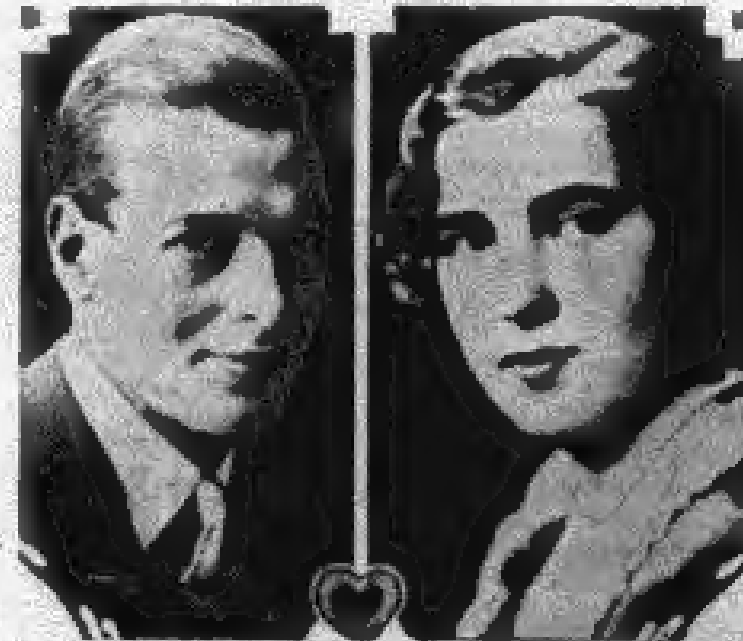

He stated that all the western provinces are making elaborate preparations to be represented at the exhibition, not only in the competitive classes, but also in the section reserved for provincial educational exhibits.

Interest in the forthcoming exhibition is very widespread in the west, Mr. Shaw stated, and farmers are working in close co-operation with provincial departments of agriculture to ensure the best possible grain samples for entry in the competitive classes.

No Reaction To January

Edmonton, Sask.—Members of the possibility of the Saskatchewan legislature meeting early in December were scotched when Premier J. T. M. Anderson stated it was extremely unlikely there would be a session until early in January. The premier made the statement on his arrival here last week.

ANGLO-SWEDISH ROYAL DOMAINS SERVICE

With the sudden arrival in London of Princess Ingrid of Sweden, Prince Rainer is again busy predicting that a royal engagement is in the offing with Prince George as the lucky man. Above is a picture of the popular couple. Prince George is the fourth son of His Majesty while Princess Ingrid is a daughter of the Queen Mother of Sweden.

HOUSE REFUSES TO DISCUSS SUN LIFE CHARGES

Ottawa, Ont.—Efforts to discuss the business and management record of the Sun Life Assurance Company of Canada, proved abortive in the House of Commons.

Amid a series of interruptions and general disorder, the speaker ruled the subject was not sufficiently important to discuss debate on the Anglo-Canadian trade treaty. And the House upheld him 124 to 26.

Michael F. D'Amico, Liberal, West Hants, sponsored the move "to investigate the present financial position of the Sun Life Assurance Company of Canada and the conduct of its senior officials as disclosed in Chicago by the recent court investigation into the affairs of Manning and Martineau, now indicted by the United States government on charges of embezzlement and larceny."

A loud fall over the speaker as the leader of the Ontario Liberal party landed the speaker a three-page typewritten statement containing his charges against the officers of the insurance company. For a minute or two the speaker studied it, then ruled the discussion out of order.

"Read the statement," shouted members of the Progressive group. "Let's know all about it," came from others. But the speaker steadily refused to read the statement or permit any discussion.

J. E. Woodsworth, Winnipeg Labour, jumped to his feet, scratching a copy of the speaker's statement. He challenged the speaker's ruling, saying that in his years in the House he had seen nothing "quite so arbitrary."

To Care For Jobless

Alberta Relief Commission To Take Charge Until Relief Camps Open

Calgary, Alberta.—Calgary city jobless had farewell to a great battle when the Alberta government decided it would take full responsibility for single jobless who have crowded into the city by the number of more than 2,500. Alberta relief commission will handle the feeding and housing of the men who will obtain two meals a day and bed tickets until relief camps are opened.

Following conversations with city officials the relief commission chairman, A. A. MacLennan, and Mayor Andy Davidson announced the agreement whereby the provincial authorities would handle the situation. A community kitchen will be opened here, and the men will be given meals after they have registered with relief officials.

How long the arrangement will continue is unknown as it depends on when the relief camps are opened. However, it was emphasized men refusing to go to the camps when they are formed would be refused any relief.

The Exchange Question

Federal Government Is Deeply Concerned About The Matter

Ottawa, Ont.—The Canadian Government is very deeply concerned about the exchange question, Hon. R. B. Stevens, Minister of Trade and Commerce, told the House of Commons. His remarks followed an amendment by G. G. Cooke, (U.F.A., Macleod), who had asked that the ratification of the imperial conference agreement be accepted with an understanding to bring the Canadian dollar to a parity with the pound sterling.

New Wheat Tariff

May Be Set Low, Into Effect In Germany

Berlin, Germany.—A new wheat tariff was in effect in Germany Nov. 5, imposing a 7.50 marks duty (about \$1.77) per ton on wheat imported on import certificates.

This tariff will not affect wheat brought into Germany, under ordinary tariff conditions, but only that grain previously brought in duty free on certificates issued by the government against wheat exported earlier in the year.

CANADIAN NATIONAL

Passing a money belt containing around-the-world steamship and rail tickets and a nest of several dollars or so in cash at the Vancouver hotel, Charles Carlson, Los Angeles, only discovered his loss after his ship, the Empress of Canada, had sailed from Vancouver.

Wireless messages to the Canadian Pacific steamship general manager agent resulted in recovery of the belt and its contents by airplane to Vancouver the next morning, after the ship had sailed.

THE HOUSE OF DREAMS-COME-TRUE

— BY —
BARBARA FRIDMAN

Author of
"The Emerald Palace," "The Emerald
of the East,"
Doubleday & Company, Inc., Toronto

CHAPTER XXXVI—Continued.

With a little inarticulate cry she ran to him—to the place that was hers, now and for all time, against his heart—and his arms, that had been so long empty, held her as though he would never let her go.

"Beloved of my heart!" he murmured. "Oh, my sweet—my sweet!"

They spoke but little. Only those foolish, tender words that seem so meaningless to those who are not lovers but which are pearls strung on a thread of gold to those who love—a treasury of memory which will be theirs in sleep and full again when the beloved voice that uttered them shall sound no more.

CHAPTER XXXVII.

"An House Not Made With Hands"

The husband of the last of the Green Dragons watched his two English visitors ride away up the steep road that led to Etrichville with unconfident regret.

They had been lodging at the Green Dragon for the past fortnight, and he had discovered that English visitors, whatever else they might be, were

not sparingly with their money. They required a good deal of attention, it is true, and had a strange, self-indulgent predilection for immovable hotels, demanding a quite unobtainable quantity of water for the room. And at all unquiet hours of the day, too—when returning from a ride or before going up to the castle to sleep, mark you!

Still, they made no difficulty about paying—and paying handsomely—for all they wanted, and if a man chooses to spend his money upon the superfluous scrubbing of his epidermis, it is, after all, his own affair!

And now the two English visitors were taking their departure from the Green Dragon and, as the landlord understood, prepared to stay at the castle itself until their return to England.

It appeared that their lady-mother—who, it was rumored in the village, was the daughter of an English nobleman—was coming to Etrichville and there was much talk amongst the village girls of weddings and the like. Apparently the Green Dragon's two eccentric visitors, not withstanding their altogether abnormal liking for soap and water, were much to meet with in other respects and had lost their hearts to the two pretty English ladies living at the castle. So, no doubt, the "daughter of an English nobleman, no less," was coming from England just here to acquire the like suitability of the British aristocrat—and also take the important part of the banquet of the dowry which might be expected to bring her future husband.

There was no question that Lady Anna was certainly coming past here—in reply to a series of joyful and imperative telegrams demanding that she should push up and come to Etrichville immediately—"For we are all enjoying ourselves for too much to return to England at present," as Nick wrote her with an impetuous disregard for the cost per word of foreign telegrams. And Lady Anna, who always considered money well spent if it purchased happiness, promised to wire back with equal extravagance that she was delighted to hear it and that she and her maid would start at once.

It was a very happy party that gathered round the table in the great dining-hall at Etrichville on the night

of Lady Anna's arrival, and beneath all the surface laughter and gaiety lay the deep, quiet knowledge that only comes to those who have enjoyed out of the night of darkness and sorrow into a glorious sunlight of happiness and hope.

After dinner, in the soft, comfortable dusk—for Etrichville had never introduced the garish intensity of electric light into the central hall—Joan sat in the quietest corner, looking appealing, lovely, of her simple, tender, full-figured of the country-side, and finally, at a murmured request from Etrichville, she gave them "The House Of Dreams."

It's a strange road leads to the House of Dreams. To the House of Dreams-Come-True, the hills are steep and the valleys deep. And seek with tears the Wayfarer's way.

The Wayfarer—I and you.

But there's more a way to the House of Dreams.

To the House of Dreams-Come-True, We shall find it yet, ere the sun has set.

If we face straight on, come the same road.

The Wayfarer—I and you.

As the last words died away in silence, she looked up and met Etrichville's eyes. He was looking against the glass, looking down at her with a tranquil happiness in his gaze.

"Our House of Dreams-Come-True, Joan, at last," he said softly.

She met his gaze with one of utter trust.

"And we won't ever fear, now, that it will tumble down. But oh! Etrichville, if we had built on a rocky foundation, we should never have felt safe—not safe like this!"

"No. You were right, Etrichville—as you always have been, always will be." Then, very low, so that none but she should hear: "Thank God for you, my sweet!"

.....

It was ultimately settled that the whole party should remain at Etrichville until the latter end of June, when they would all return to England together and the two weddings should take place as soon as possible afterwards.

"But we won't have a double wedding," declared Joan. "It's always supposed to be unlucky."

"Do you believe in good and bad luck, then?" asked Lady Anna, smiling.

"I don't know," Joan answered seriously. "But it's always just as well to be on the safe side. Anyway, we won't tempt Fate by running unnecessary risks!"

"Nonsense, nonsense," cried Etrichville. "In the excitement of the moment we might get mixed and the passion which we are in the wrong people. The average nerve-struck attendant upon the role of bridegroom will be quite sufficient for me, thank you, without the added uncertainty as to whether I'm getting tied up to the right woman or not."

He sprang lengthened out into another, and, to the last increased, looking and swimming on the big lake that nestled in a bowl of the hills were added to the long ride and excursions with which they visited every the pleasant, smoking days.

Ever afterwards, the memory of those beautiful months at Etrichville would linger in the minds of those who shared them, as something rare and precious. It was as though for this little span of time, passed so far away from the noise and bustle of the big world, they had pulled their barges out of the busy fairway of the river and moored it in some quiet, shady backwater. Then, when they were rested and refreshed, they would be ready to face once more, with fresh strength and courage, the difficulties and dangers of mid-stream.

"The very best of us slowly over—the long, long looking of eyes," said Joan regretfully. "The only thing that reminded me to the fact is that after we've married Etrichville and I propose to spend at least six months out of every year at Etrichville."

An Incident Near

At an early hour on Saturday morning, the 14th, members of the Jan. Christie family were awakened by a dense smoke which filled their sleeping quarters. On an investigation being made, it was found that the stove which was operating their electric heating apparatus was afire. The electric power was hastily turned off, and Mr. Christie and Mr. Nichols got the fire under control, before any serious damage had been done.

Teachers' Convention.

The public schools are closed this week for two days, while the teachers are in attendance at the Convention in Education of the teachers of Onaway and Edmonton Rural Inspectors. The session opened yesterday, when His Worship Mayor Knott gave an address of welcome. Mrs. P. Baker, minister of education, also gave an address.

This morning (Thursday) the program is being devoted entirely to demonstration in which four forty-minute lessons will be taught.

Funeral of Mrs. John Strass.

The funeral took place on Friday afternoon last of Mrs. Josephine Strass, beloved wife of Mr. John Strass. Deceased was in her 44th year. Service was held at Glory Hills Reform church by the pastor, Rev. C. H. Reppert, and interment took place in the church yard adjoining.

Deceased leaves to mourn her loss, beside her husband John Strass, 2 sons—John and Irvine, at home; and William, in Germany; and one daughter Annie, at home.

Saturday's Convention.

The work of arranging for the U. F. A. convention to be held here on Saturday next, is nearing completion. Mr. G. Herbert, chairman of the reception committee, promises that those delegates who attend will have no cause to complain of their treatment while in Stony that day.

Arrangements have been made to have the delegates assemble in the Service Garage, if the number of those who attend cannot comfortably be accommodated at the Moose Hall.

Altho Premier Brownlee was confined to his residence last week thru illness, and was compelled to cancel all his engagements for that time, it is fully expected he will be able to be present at Stony on Saturday next, and give an address.

The others billed to give addresses are: Mrs. Warr, of the U. F. W. A.; Donald MacLeod, our Assemblyman; and N. F. Priestley, vice-president of U. F. A.

BOXING! FRIDAY, NOV. 11 At DUFFIELD.

Norman Ray, 142 lbs., vs.
Art Tyrrell, 140 pounds.
15 rounds of Preliminary 1.

**DANCE after the Last
Knockout.**
Adm.—Boxing and Dancing,
Gents 50c.

Wabole's Weekly Meet.

The Wabole club held a social evening at the United church, Friday Nov. 4. The guests of honor were Spruce Grove Young People's club. A very enjoyable evening was spent in playing games; afterwards a delightful lunch was served by the hostesses, assisted by Mrs. L. Kowensky and Mrs. Sieber.

Meeting of the Co-op.

A meeting of the Co-op of Stony Plain district was held here Saturday last, with Pres. W. T. Prupp in the chair. A report of the dealings of the Co-op for this season was read and proved to be quite satisfactory. Among those present were: W. C. Matthews, Seba Beach; Mrs. McDonald, Hobbins; W. M. Washburn and Geo. Hertert.

Hansen—Albrecht.

Glory Hills Baptist Church was the scene of an interesting ceremony on Thursday afternoon Nov. 3rd, when Emma, the daughter of Mr. and Mrs. Conrad Albrecht, became the bride of Markus Hansen. Rev. Fred W. Benke performed the ceremony. Miss Irene Jansson played the wedding march. The bride was beautifully gowned in a white lace dress and carried a bouquet of pink and white carnations. She was attended by her sister Annie, who looked charming in a cream lace dress; and by Miss Marie Hartman, who was dressed in a pink lace dress.

The groom was attended by Mr. Wm. Saw and Mr. Wm. Albrecht, brother to the bride. After the service a number of relatives and friends were entertained at the home of the bride where a delicious wedding supper was served. The evening was spent with short speeches, songs and music.

The many presents given to the young couple show in what high esteem they were held.

The happy couple intend making their home on the farm of the groom in Onaway district. We wish them God's blessing and much happiness. —F.W.B.

Duffield Doings.

Bill Quigg, who received injuries recently while engaged in road work near Highvale, is resting easy in an Edmonton hospital. He had received injuries to his eyes and arms from a premature explosion of dynamite.

Among the large number of attractions set for the evening of Friday the 11th is to be noted the big double attraction at Duffield. This is the series of boxing bouts, headed by those two well-known light weight mix artists, Norman Ray and Art Tyrrell, who are expected to bang each other around the ring for 6 rounds. Preceding this bout, the fans will witness the boxing action of about a dozen amateurs, which are likely to prove as interesting as the "go" of the two star performers. Boxing will be followed by a dance. The admission price is away down: oh, if you have 4 bits, you can't afford to miss this fall evening's entertainment.

Stony Plain and District

Tomorrow, Nov. 11th, is a public holiday; all places of business in Stony Plain will close.

The old Atlas Lumber of Bee has been moved off Main street to the corner of Meridian road and Station street, where "Tony" Rosenberg is making use of it as a crushing mill.

Under the auspices of the Ladies Aid of United church a chicken supper and lunch will be held in the church on Sat. Nov. 26. Bazaar opens at 2. Supper from 5.30 to 7.30.

The Ladies Aid of United church are holding a tea and shower for their annual bazaar on Wed. Nov. 16, from 2 to 6 at the home.

All hands and the goalies from the Stony teams were out on Brent's Lake Sunday afternoon for hockey practice. Sales were chosen, and some good training was obtained.

Catering to the very popular demand for wheel drives, the Senior hockey club will stage one of these at the town hall on Friday Nov. 18; four time, five prizes.

The open season for ducks ends on Tues. next, Nov. 15.

M. Mecklenburg, the well-known optician, will be at the Royal Hotel, Stony Plain, on Sat. Nov. 12.
